

# Who uses our Data Consulting and Support Services to transform, advance, and adapt?

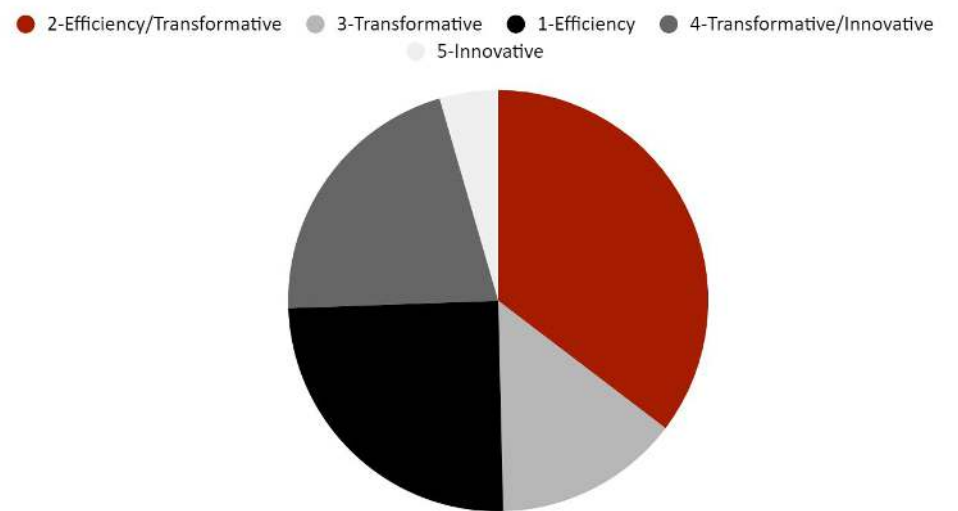

Our large data program clients seek Xentity for consulting and support for large data challenges in Geo, Open, Big, and IoT data. Here is an at-a-glance look into who are our clients, in what industries, and a portfolio view of data and service types

## Clients

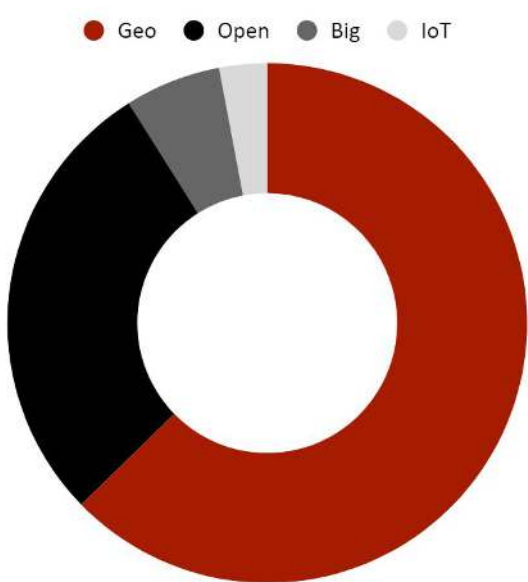

Our "Earth" and CIO data work spans Transportation, Land, Science, Health, Energy.

## Industries

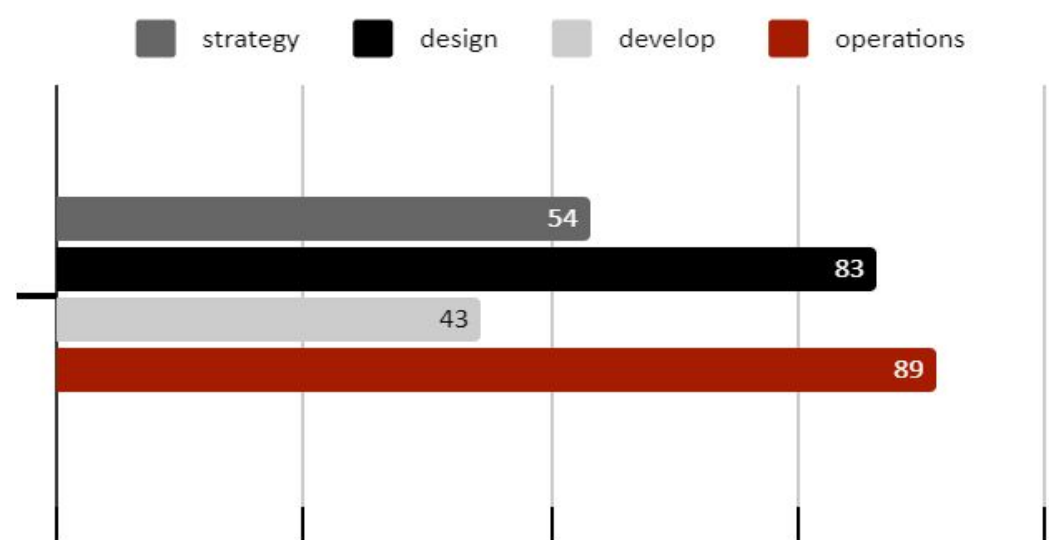

Our data program clients engage us primarily to support transformational efforts

## Data Types

Our work spans Geo, Open, Big, and IoT data with > 50% having a Geospatial data focus.

## Services

Half our efforts are in Program Consulting (Strategy & Design)...  
...and the other half in heavy lift Data Solution Dev & Ops Services

Data is now a key asset to support and streamline key decisions. For data programs seeking to adapt, Xentity brings best practices, advances visions and generates new product roadmaps.
